Surveyors Busy.

GUTHRIE, I. T., May 3.—The surveyors engaged in laying out nnew the Gutinie town site have succeeded in locating the exterior corners of the husiness quarter, and Mayor Dyer at once issued an order to all properly owners to make their lots conform to the lines laid down,

The official survey will not be completed before Saturday and In the meantime the representative men of Unthrie will do their utmost to make the crisis of short duration when it does come. The past few days have wrought many changes in both Guthrie and Oklahoma City.

At least lifty buildings have been erected in each place, all of them wooden, with the traditional square front, Two banks are doing business in Guthrie, and a third will be in operation this week. Supplies are being hauled in by the railroads, and board and lodgings may now be secured for a reasonable sum.

The buildings are erected so that they may be easily moved, and upon the conclusion of the survey a general shifting of locations may be looked for. In three or four weeks both towns will have reached a point when predictions as to their future can be made with greater certainty.

The work of settling claims is proceeding rapidly, but there are few indications that settlers will do much townrd improving lands this year.

Between Unthrie and Kingfisher there are not more than a dozen claims on which plowing has been begin. The fact is the senson is too far advanced to promise any decent reward for labor this spring, and Gas given in the painless extraction of teeth. many of the settlers have gone to Guthrie, Okluhoma City or Kingfisher, where there is a demand for men and teams in hauling

> Oklahomn City has settled its differences arising from claim jumping, and the people there profess to view the general situation with great satisfaction.

Must Get Off the Strip.

FORT RENO, I. T., May 3.—Capt. Hall and a company of cavalry left Kingfisher Wednesday to eject settlers from the Cherokee strip, and a company also left Guthrie for the same purpose. Several hundred settlers are now on the strip.

They are determined men who have staked everything on the Oklahoma opening, and, failing to get their claims, have gone to the strip. No organized resistance to the military is expected, but cases of individual ro sistance and n large amount of hardship and snifering are certain to ensue.

At the War Department.

WASHINGTON, May 3,-The following telegram has been received at the war department from Gen. Crook's headquarters at Chicago: "The following received from Gen. Merritt: 'Everything continues quiet. Local town governments are practically established. I propose to visit Cherokee outlet, and after arranglug matters there to return to headquarters at Leavenworth, if there are no other instructions."

GREAT SCHEME.

How Buffalo Bill Gets Free Advertising in the Paris Papers.

Paris, May 3,-Of ail the excitement to which the Parisiau world is looking forward In connection with the exposition, one of the greatest is Buffalo Bill's Wild West show. Bill has shown a good deal of ingenuity in his advertisements.

He has stuffed the French papers with storles of the "corporation of New York capitalists" by which the show has been orgauized and conducted. The show itself is sald to be under the government of the United States. Red Shirt and Rocktry Bear (which perhaps means Rocky Bear) are heroes of the "Last of the Mohicans."

All this ndvertisement and more of the tame sort the Paris papers published gratuitously, to Bill's ontire present satisfaction and probably his large future profit. One wuy and another he has induced the Parisian authorities and the municipality of Neuilly to grant him an excellent place for his show Shop north side of Fourth street, between close by the Mulliot gate, and all Paris is Limestone and Market, Maysville, Ky. j20dly agog to see the "ethnographic spectacle" close by the Mulllot gate, und all Paris is which Coi, Cody is to present before them. The Wild West will certainly not be a disappointment.

Telling Yankees About the Great Future of Their State.

New York, May 8.—A party of five men passed through New York recently on their way to New England to explain to capitalists and manufacturers there the natural advantuges of northern Alabama, and especially of Florence, as a hield of investment. They were Gen. James A. Walker, ex-lieutenant governor of Virginia, und Maj. J. C. Greenwood, of Wytheville, Vn., Judges William A. Hudson, William H. Bolling, and S. J. Grnham, of Florence, Ala. capital. The party will visit Hartford, Fall River, New Bedford and Boston, and a number of wher New England cities.

Judge Hudson, in speaking of the objects of their visit, said: "We are working to build up the industries of northern Alaonma and the south generally. We are rich in the gifts of nature, but lacking the capital and experience to erect factories, we are seek-lng them in the north. The iron markets of the south control the trade at Pittsburg, and the lower grudes of cotton goods made in Alabama are sold in Lowell In competition with the goods made there. Labor is from 30 to 50 per cent. cheaper in Florence than in Lowell, yet the cost of living is so much less that the mechanic can do better in the ead on the smaller wages. To capitalists who will establish Far Advanced - The Silvation Prom- factories in Florence we offer a ten years' exemption from local taxation, ample huilding sites, and desides, we loan them money or take part of their stock. All these advantages make it possible for a well managed cotton or iron nilll to yield an annual dividend of from 10 to 20 per turn this week. Company D, of the Sixth cent. Another branch of industry that will lafantry arrived Wednesday evening from yield large profits is making of furniture und other wooden articles. Why, at home I sleep in n bed the wood of which was cut in Alabama, shipped to Grand Rapids, Mich., made into a bed, and shipped hack to Florence. There are hundreds of thousands of acres of walnut and other trees there in which the ax of the woodman has never been heard, and flue marble quarries are right at hand."

In answer to a question about the views of the members of the party ou the tariff, Judge Hudson laughingly said that their trip had nothing to with polities, but that they were all strong protectionists.

Our Flag Foreibly Hauled Down by Canc dians on the Fourth of July.

OTTAWA, Ont., May 3 .- An unexpected international complication threatens to arise out of the Bridgewater business. The ministry are mad about the blunt and plainspenking way in which Capt, J. iI. Allen when here maintained his right to compensation as owner of an American ship seized illegally.

Thep have resolved to do nothing in the matter, and if the international questions raised on the American side are to be maintained it will have to be done by resolute action. Before leaving Ottawa Capt. Alien stated that after the Bridgewater was seized the crew ran up the stars and stripes on the Fourth of July. The Canadian officials, he alleges, required that the fing be hanled down, and none of the crew being willing to obey they hauled it down against Capt, Allen's protests.

Evidence of this is forthcoming, and will be submitted to the authorities at Washington iferays he did not press the matter before, as he fenred it might cause a delay in the settlement he hoped to effect, but under present circumstances he has no alternative but to lay the Insult to the American flag before the government of the United

England's Attitude on the Samoan Question

NOT SO CLEARLY DEFINED AS IT WAS SOME TIME AGO.

She Seems Auxious to Court Favor With Germany Even If It Should Not Please the United States -Probability of Mailetoa's Reinstatement as King of Samoa. Other Foreign News.

LONDON, Mny 3.-The Times has the foilowing special from its Berlin correspond-

"There is one thing less clear than some ethers connected with the conference sitting bere, and that is the attitude of England to the Samean question. At Washington England was decidedly in favor of the course suggested by Germany, and now there is nothing to show that she is not again disposed, if anything, to preve a little more complaisant to Germany than to the United States. If this be so, it will be thought a pity by these who expect the English govern. ment to know on which side its bread is buttered, and who rightly argue that England and her coionies have more both to hope and to fear from America, with her future developments, than from any other country

So reason observers who are profoundly convinced that the cordial friendship of the United States is of much more value to England than is that of any state in the European system, from which Great Britain is becoming more and more detached by reason of her grateful growth into a coloniai world power, with an ever-widening and brightening prospect. Imperial federation is the true foreign policy for England, argue the observers above referred to, and she has litthe or nothing to do now with affairs of the continent, but everything with her interest beyond the seas, and with the states and eclonies affected by those interests.

She Has Nothing to Fear.

From this point of view, therefore, It is somewhat puzzing to many to find Lord Sedisbury laying such ostentatious stress on ectoniai entente cordiaie everywhere with Germany, from whom, it it be preperly considered, England has really nothing whatever to fear, and fittle or nothing to hope, and thus incurring a risk, slight though it may be in the present case, perhaps, of estranging the affection of those who, in certain circumstances, might prove to England as troublesome opponents as they could otherwise be staunch and useful friends. Not that the Samoan question itself is capable of producing the effects here alluded to, but at the same time its treatment by England ought not to be such as is calculated to ruffle the sensibilities of either Americans or Australian coionists whose disappointment could not possibly be counterpoised by any amount of gratitude.

On the part of Germany as between aif Anglo-Saxon races, outre mer and the German empire, the position of Eagland is anniegeus to the attitude of Germany to Austria and Russia respectively, "between whom," sold Prince Bismarck to Gortchakoff, at the congress of Berlin, "you must not force me to choose." I repeat that the issues involved in the Samoan question are by no means se very pregnant of high political consequences, but still the treatment of that question, ln the opinion of some well qualified to judge, ought to be a test of the degree to which England has kept pace with the true priuciples of political expediency.

Maileton Released.

It is stated that the liberation of Muliotoa, the deposed king of Samon, has been voluntarily nunounced to the Samoan conference. It is supposed that this action on the part of Germany is the prelude to the reinstatement of Malietoa. It is stated that a sub-committee of the

Samoan conference has under consideration a plan for the future government of Samoa under a native ruler, with a tribunal to adjudicate the question of land tenure.

A Novel Advertising Conceit. Paris, May 3 .- A shrewd piece of advertising is to be done at the coming exposition by a certain savings bank in Paris. Its capital, estimated at 8,000,000 francs, is to be exhibited in the form of a column built of francs and five-franc pieces. The base of the column is to be four-and-a-haif feet square and height over twenty-one feet, It is shrewdly suspected that the coins in the column will not be genuine, but imitations of good money, and it is as shrewdly suspected that counterfeit coin may represent counterfeit capital.

Important Discoveries in Ancient Mounds

Near Floyd, lowa. WATERLOO, Iowa, May 3.-Important discoveries have been made near Floyd, Iowa, of remains of the ancient mound builders. A circular mound thirty feet in diameter and about two feet high has been opened and five skeletons found. They were exceedingly well preserved, the earth having been very closely packed around them. Three of them were males, one a female and the fifth a babe.

The skull of the female is in a good state of preservation, and those who have in le careful mensurements of it say that it shows that the person belonged to the very lewest type of humanity. Archaelogists claim that the measurement shows inferiority even to the celebrated neanderthal skull. These bones are claimed to be the most perfect of any remains of the mound builders yet discovered. There are several other mounds near where this one was opened, and they will be examined in a few days.
